CONTENTS

15 Iron ore reduction/cementation: experimental results and kinetic modelling
J. Zhang and O. Ostrovski

22 Kinetics of chromite ore reduction from MgO–CaO–SiO_2–FeO–Cr_2O_3–Al_2O_3 slag system by carbon dissolved in high carbon ferrochromium alloy bath
M. B. C. Tsomondo and D. J. Simbi

29 Splashing mechanism in combined blowing
T. Fabritius, P. Mure, E. Virtanen, P. Hannula, M. Luomala, and J. Härkki

36 Effect of outlet positions, height of advanced pouring box, and shroud immersion depth on mixing in six strand billet caster tundish
P. K. Jha, S. K. Dash, and S. Kumar

47 Dissolution of alumina particles in CaO–Al_2O_3–SiO_2–MgO slags
M. Valdez, K. Prapakorn, A. W. Cramb, and S. Sridhar

53 High speed continuous casting of steel billets
Part 1: General overview
C. Chow and I. V. Samarasekera

61 High speed continuous casting of steel billets
Part 2: Mould heat transfer and mould design
C. Chow, I. V. Samarasekera, B. N. Walker, and G. Lockhart

70 Finite element modelling of strip curvature during hot rolling
C. W. Knight, S. J. Hardy, A. W. Lees, and K. J. Brown

77 Online characterisation of steel structures in hot strip mill using laser ultrasonic measurements
B. Hutchinson, B. Moss, A. Smith, A. Astill, C. Scruby, G. Engberg, and J. Björklund

91 Influence of magnesia on sintering characteristics of iron ore
U. S. Yadav, B. D. Pandey, B. K. Das, and D. N. Jens

96 Production and properties of burnt lime coated with dicalcium ferrite
M. S. Lee and P. V. Barr

101 Optimisation of method for reducing residual stresses after cold bar drawing
M. Akiyama and T. Kuboki

First of three refereed selections of papers from the 6th International Conference on 'Molten slags, fluxes, and salts' held in Stockholm and Helsinki on 12–16 June 2000

107 Experimental examination of slag/refractory interface
S. Riaz, K. C. Mills, and K. Bain

115 Thermophysical properties of slags for process control
B. J. Monaghan and R. F. Brooks

121 Improvement of reaction efficiency in hot metal dephosphorisation
S.-Y. Kitamura, K. Yonezawa, Y. Ogawa, and N. Sasaki

125 Enhancing rate of slag–metal reactions involving carbon in liquid iron
D. E. Woolley and U. B. Pal

133 Stainless steel slag fundamentals: from furnace to tundish
E. B. Pretorius and R. C. Nunnington

140 Inclusion engineering: a key tool in achieving steelmaking operations stability at OneSteel Whyalla
C. Garlick, M. Griffiths, P. Whitehouse, and C. Gore

147 Slag entraining vortexing funnel formation during ladle teeming: similarity criteria and scale-up relationships
R. Sankaranarayanan and R. I. L. Guthrie

154 Interfacial phenomena between fluxes for continuous casting and liquid stainless steel
P. R. Scheller

---

169 Characterisation of structure of iron ore sinter and its behaviour during reduction at low temperatures
H. P. Pimenta and V. Seshadri

175 Influence of Al_2O_3 and TiO_2 on reduction degradation behaviour of sinter and hematite at low temperatures
H. P. Pimenta and V. Sheshadri

180 Development of mechanical drive type non-sinusoidal oscillator for continuous casting of steel
H.-P. Liu, S.-T. Qui, Y. Gan, H. Zhang, and J.-Y. De

Second of three refereed selections of papers from the 6th International Conference on 'Molten slags, fluxes, and salts' held in Stockholm and Helsinki on 12–16 June 2000

185 Continuous casting mould powder evaluation
S. McKay, N. S. Hunter, A. S. Normanton, V. Ludlow, P. N. Hewitt, and B. Harris

191 Physical properties of mould powders for slab casting
J. A. Kromhout, V. Ludlow, S. McKay, A. S. Normanton, M. Thalhammer, F. Ors, and T. Cimarelli

194 Powder consumption and melting rates of continuous casting fluxes
S. Sridhar, K. C. Mills, and S. T. Mallaband

S. McKay, N. S. Hunter, A. S. Normanton, V. Ludlow, P. N. Hewitt, and B. Harris

191 Physical properties of mould powders for slab casting
J. A. Kromhout, V. Ludlow, S. McKay, A. S. Normanton, M. Thalhammer, F. Ors, and T. Cimarelli

194 Powder consumption and melting rates of continuous casting fluxes
S. Sridhar, K. C. Mills, and S. T. Mallaband

199 **Mould powder consumption of continuous casting operations**
M. Kawamoto, T. Murakami, M. Hanao, H. Kikuchi, and T. Watanabe

203 **Effect of solidus temperature and crystalline phase of mould flux on heat transfer in continuous casting mould**
A. Yamauchi, K. Sorimachi, and T. Yamauchi

209 **Effect of BOF top blowing and bottom stirring conditions on suppressing excessive oxidation**
K. Naito, S. Kitamura, and Y. Ogawa

215 **Improvement of steel cleanliness by controlling slag composition**
B.-H. Yoon, K.-H. Heo, J.-S. Kim, and H.-S. Sohn

219 **Ejection of steel and slag droplets from gas stirred steel melts**
I. Hahn and D. Neuschütz

224 **Slag–metal reactions during ladle treatment with focus on desulphurisation**
M. Andersson, M. Hallberg, L. Johnsson, and P. Jönsson

245 **Three-dimensional hot rolling model for prediction of camber generation**
S. J. Hardy, D. L. Biggs, and K. J. Brown

253 **Modelling of floorplate pattern generation**
A. Bush, J. Tunstall, and M. Umpleby

257 **Electric arc furnace dust–coal composite pellet: effects of pellet size, dust composition, and additives on swelling and zinc removal**
M. C. Mantovani, C. Takano, and P. M. Büchler

266 **Crystal structure of calcium and aluminium silicoferrite in iron ore sinter**
H. S. Kim, J. H. Park, and Y. C. Cho

271 **Aspects of smelting reduction of chromite ore fines in $CaO–FeO–Cr_2O_3–SiO_2–Al_2O_3$ slag system by carbon dissolved in high carbon ferrochromium alloy bath**
D. J. Simbi and M. B. C. Tsomondo

Final of three refereed selections of papers from the 6th International Conference on 'Molten slags, fluxes, and salts' held in Stockholm and Helsinki on 12–16 June 2000

276 **Control of slag and inclusions in traditional Japanese iron- and steelmaking**
T. Kitamura, H. Katayama, Y. Anazawa, M. Haba, T. Kishida, and Y. Murakawa

281 **Experimental simulations of primary slag formation in blast furnace**
P. A. Tanskanen, S. M. Huttunen, P. H. Mannila, and J. J. Härkki

287 **Electrode reactions in dc electroslag remelting of steel rod**
M. Kawakami, T. Takenaka, and M. Ishikawa

293 **Mould flux film between mould and steel shell**
P. O. Hooli

297 **Simultaneous reduction of oxides and dissolution of alumina in steelmaking slag**
M. Divakar, M. Gönerup, and A. K. Lahiri

303 **Melting speed of mould powders: determination and application in casting practice**
J. A. Kromhout and D. W. van der Plas

308 **Mineralogical evaluation of ladle slags at voestalpine Stahl GmbH**
W. Posch, H. Presslinger, and H. Hiebler

326 **Water model study on inclusion removal from liquid steel by bubble flotation under turbulent conditions**
Lifeng Zhang, S. Taniguchi, and K. Matsumoto

337 **Experimental and computational study of nozzle electromagnetic stirring and its effects on solidification structure**
T.-J. Li, Y.-H. Zhao, B. Wen, and J.-Z. Jin

341 **Dynamic strain aging effects in niobium microalloyed steel**
S. Gündüz

347 **Modelling molten flux layer thickness profiles in compact strip process moulds for continuous thin slab casting**
E. Macías A., A. H. Castillejos E., F. A. Acosta G., M. Herrera G., and F. Neumann

359 **Analysis of thermomechanical behaviour in billet casting with different mould corner radii**
J. K. Park, B. G. Thomas, and I. V. Samarasekera

376 **Design of single element flow control device in twin strand billet tundish for continuous casting of steel using flow simulation model**
C. M. Fan, S. M. Pan, H. S. Wang, and W. S. Hwang

383 **Modelling of ladle glaze interactions**
G. J. Hassall, K. G. Bain, N. Jones, and M. O. Warman

390 **Numerical modelling of iron flow and heat transfer in blast furnace hearth**
V. Panjkovic, J. S. Truelove, and P. Zulli

415 **Study of optimal Ca-Si injection position in gas stirred ladle based on water model experiment and flow simulation**
C. M. Fan and W. S. Hwang

427 **Chemical characteristics of inclusions formed at various stages during the ladle treatment of steel**
K. Beskow, J. Jia, C. H. P. Lupis, and Du Sichen

437 **Non-metallic inclusions in aluminium killed steels**
R. Dekkers, B. Blanpain, P. Wollants, F. Haers, C. Vercruyssen, and B. Gommers

445 **Concept of dynamic foaming index and its application to control of slag foaming in electric arc steelmaking**
R. D. Morales, H. Rodríguez-Hernández, A. Vargas-Zamora, and A. N. Conejo

454 **Prediction of aluminium concentration in molten zinc pot of continuous hot dip galvanising line**
J. H. Shim, S. H. Chung, and Y. W. Cho

469 **Measurement of phase transformations in steels using electromagnetic sensors**
C. L. Davis, M. Ph. Papaelias, M. Strangwood, and A. Peyton
